OBJECTIVE

Enthusiastic front end web developer with strong communication skills, dedicated to delivering high-quality code and collaborating effectively within a team, actively working on enhancing public speaking abilities to excel in presentations and team discussions.

WORK EXPERIENCE

UI/UX Intern

KaizIQ

📅 10/2023 - Present 📍 Remote

KaizIQ is a pioneering force in the realm of DevOps, redefining the way software development and operations are orchestrated. The mission is to empower organizations, irrespective of their scale, with a unified and seamlessly integrated DevOps ecosystem.

- Optimizing the responsiveness of KaizIQ's product interface.
- By making the product responsive, I will contribute to an improved user experience.
- Users will be able to access and interact with the application effortlessly on both desktop and mobile devices, enhancing overall usability.

PROJECTS

Feel Beautiful - an E-commerce App

📅 08/2023 - Present
🔗 https://mainehahu.github.io/FeelBeautiful/

- Unique feature: Color selection for products like lipstick, foundation, eyeliner, enabling dynamic choices.
- **Smart cart** features: Increasing the number of products in the same color while preventing duplication; adding new products for other colors.

NETFLIX clone with 'Mood' feature

🔗 https://mainehahu.github.io/NETFLIX-clone-with-Mood-Feature/

- **Added mood option** feature.
- According to the mood chosen by the person using it. It suggests a few popular movies.

Multi medicine reminder

🔗 https://mainehahu.github.io/Multi-Medicine-Reminder/

- Following the time selection, it sounds an alarm and plays an audio clip.
- **Multiple alarms** with the name of the medicine can be set.
- The theme can be switched between dark and light modes.

"Debounce and Throttle" in JavaScript

🔗 https://mainehahu.github.io/Search-bars/

- This project **explains** how JavaScript's debounce and throttle functions.
- It **calls an API** a set **number of times** using various methods.

Awesome use of CSS flex and transition

🔗 https://mainehahu.github.io/Flex-Panels/

- When you click, the text on the screen begins to animate and the image takes up more space.
- When you click a second time, everything returns to how it was.
